# FOOD SERVICE FILTRATION SYSTEM 1-STAGE

## WD1-300-IMTS ULTRA FLOW 1-STAGE SYSTEM

### Scale Protection

Protects down line equipment from contaminants and scale build-up.

### FRESH TASTING

Provides delicious drinking water that makes ice, coffee, tea, and all other beverages taste their best!

- Ice Machines
- Coffee Makers
- Espresso Machines
- Steamers
- Beverage Centers
- Hot Tanks
- Valves and Solenoids

## 1-STAGE FOODSERVICE FILTRATION SPECIFICATIONS

### WDI-300-IMTS Ultra Flow 1-Stage System

Simple and Efficient. The WDI-300-IMTS Offers Carbon Filtration and Polyphosphate Scale Reduction in a Single Vessel.

- 10-Micron Granular Activated Carbon (GAC) Removes chlorine, chloramines and chemicals as well as bad tastes & odors from the water.
- Polyphosphate prevents calcium and magnesium from sticking to surfaces, inhibiting scale build up. Reduces maintenance and extends the service life of downline equipment.

### FEATURES ONE EXTRA LARGE 10-MICRON GAC/ POLYPHOSPHATE FILTER FOR MAXIMUM PROTECTION.

Carbon Filtration reduces a large number of contaminants including but not limited to: Chlorine, Alcohols, Benzene, Chloramines, Detergents, Hydrogen Sulfide, Methyl Acetate, THM's, Chloroform, Formaldehyde, Herbicides, Antifreeze, Insecticides, Radium, and bad tastes and odors.

Service Life\*: 15,000 gallons chlorine reduction  
Flow Rate: 2 gallons per minute  
Minimum Operating Pressure: 40 psi  
Maximum Operating Pressure: 125 psi  
Maximum Operating Temperature: 100° F  
Dimensions: 21-3/8" high 9" wide

\*Replacement is recommended every 6 months in most applications.

**WDI-300-IMTS** The WD 1-300 Sanitary Quick Change filter design means no tools and no mess! The factory sealed cartridges can be easily changed in seconds with just a quarter turn.
